Civil Engineer

Education

A Bachelor's degree in Civil Engineering is required for this position. Candidates with a Master's degree or additional certifications in areas such as construction management, structural engineering, or urban planning will be considered favorably, as these qualifications add significant value to the role.

Description

We are looking for a highly skilled Civil Engineer to join our real estate development team. The successful candidate will play a crucial role in designing, planning, and overseeing the construction and infrastructure development of various residential, commercial, and mixed-use projects. This position requires close collaboration with architects, project managers, and other key stakeholders to ensure that projects are completed on time, within budget, and meet the highest quality standards.

Responsibilities

The Civil Engineer will be responsible for conducting feasibility studies and site investigations to assess project viability. They will develop detailed engineering plans and blueprints, ensuring that all designs comply with local, state, and federal regulations. The role involves managing construction activities, coordinating with contractors, and monitoring project progress, making adjustments as necessary to stay on track. Additionally, the engineer will prepare cost estimates and budgets, collaborate with architects, environmental consultants, and regulatory agencies, and oversee the maintenance of existing infrastructure.

Qualifications

The ideal candidate will hold a Bachelor's degree in Civil Engineering or a related field, with a Professional Engineer (PE) license being highly preferred. A strong knowledge of construction materials, methods, and regulations is essential, along with proficiency in civil engineering software such as AutoCAD, Civil 3D, and SAP2000. The role requires excellent problem-solving skills, attention to detail, and strong communication and teamwork abilities.

Job Benefits

We offer a competitive salary, complemented by performance-based bonuses. Our benefits package includes health, dental, and vision insurance, along with a retirement savings plan that features a company match. Employees also enjoy paid time off and holidays, as well as opportunities for professional development and career advancement within the company.

Experience

Candidates should have a minimum of 5 years of experience in civil engineering, preferably within the real estate or construction industry. A proven track record of successful project management and delivery is highly desirable.

Skills

The successful candidate will possess strong technical skills in civil engineering and construction management, with proficiency in relevant software tools such as
